### Data Analyst

**Minimum Level of Education:** Bachelor's Degree

**Job Responsibilities**

- Maintain strict confidentiality and security of the personal health information contained in the data sources.
- Assist Senior Data Analysts and Statisticians in working with databases performing functions including data cleaning and maintenance; extracting data, importing/exporting data into various formats.
- Formulate queries to extract, manipulate, format and present data stored in relational databases. Use SQL, MS Access, and Excel. Perform data analysis under direction of Senior Data Analysts and Statisticians to create summaries and tables; run summary statistics, refine database queries to generate subsets of databases and tables.
- Assist Project Managers in administrative support functions, including scheduling tasks, tracking Team progress using designated company project management techniques and software.
- Adhere to IMS Quality Assurance procedures including: following the SOP in areas assigned, resolving problems that might affect or be encountered by others, identifying and sharing best practices that could be helpful to others and documenting all work by following established procedures.
- Communicate with technical and non-technical end users, providing clear explanation of procedures used and results obtained from data analysis tasks.
- Participate in special projects.

## **Statistician**

**Minimum Level of Education:** Master's Degree

### **Job Responsibilities**

- Maintain strict confidentiality of the personal health information contained in project data sources.
- Apply mathematical and statistical knowledge to the extraction/addition/collection/ processing and analysis of project data. With assistance and guidance from Senior Statistician, produce testable hypotheses and interpretation of results.
- Provide advice and input in designing the project databases.
- Analyze, interpret and summarize data using computer software including SAS, MS Access, Excel and other analytical and database products authorized under the terms of the contract with client.
- Work with Team members and subject matter experts to develop hypotheses to detect patterns and abnormalities in the data that may indicate fraud or erroneous billing or claims processing, assist Team members in the construction of hypotheses. Under the direction of Senior Statistician, convert hypotheses to database queries or statistical tests and estimation procedures to extract results from project databases or interpret extractions.
- Adhere to IMS Quality Assurance standards including: following the SOP in areas assigned, resolving problems that might affect or be encountered by others, identifying and sharing best practices that could be helpful to others and documenting all work by following established procedures.
- Support the Team by producing and reviewing materials needed for required reports and contract deliverables.
- Participate in special projects.

## **Project Manager**

**Minimum Level of Education:** Bachelor's Degree

### **Job Responsibilities**

- Sets corporate strategy to establish and sustain the mission, vision and goals of IMS. Works with affiliated companies to develop overall corporate strategies.
- Continually seeks new business opportunities for IMS and presents the company's qualifications and strengths to prospective clients.
- Directs the Deputy and Team Leads in developing individual Project Plans and provides guidance in day-to-day management and coordination of IMS engagements. Resolves problems and adjusts priorities as needed.
- Assesses company and individual performance.
- Develops cost proposals and oversees the IMS budget.
- Plans and manages recruitment efforts.
- Establishes working relationships and lines of communication with clients. Serves as primary liaison with clients.
- Assures all personal and protected data are secured and that strict confidentiality of data is maintained by all IMS team members.
- Oversees the company's quality assurance program, providing guidance, direction and appropriate resources to ensure IMS provides high quality deliverables to its clients. Continually monitors and adjusts, as necessary, the project plan and/or team assignments to accomplish the scope of work.

## **Senior Statistician**

**Minimum Level of Education:** Master's

### **Job Responsibilities**

- Maintain strict confidentiality and security of the personal health information contained in project data sources.
- Upon discussion with other Team members and Medicare/Medicaid subject matter experts develop hypotheses to detect patterns and abnormalities in the data that may indicate fraud or erroneous billing or claims processing. Assist Team members in the construction of hypotheses. Convert hypotheses to database queries or statistical tests and estimation procedures to extract results from project databases or interpret extractions.
- Apply mathematical and analytic knowledge, methods, and procedures to test formulated hypotheses, develop trends and summary statistics, and detect data patterns through algorithms or mathematical procedures designed.
- Analyze, interpret and summarize data using computer software including SAS, MS Access, Excel and other analytical and database products authorized under the terms of the contract with SGS.
- Provide advice and input in designing the project databases.
- Adhere to IMS Quality Assurance standards including: following the SOP in areas assigned, resolving problems that might affect or be encountered by others, identifying and sharing best practices that could be helpful to others and documenting all work by following established procedures.
- Support the Team with the materials needed for required reports and contract deliverables.
- Provide guidance and direction to Statisticians and Data Analysts in collection, analysis and presentation of project data.

- Serve as a Team Lead by planning, coordinating, and documenting project related activities, managing the team, as well as communicating directly with a client.
- Participate in special projects.

## **Senior Data Analyst**

**Minimum Level of Education:** Bachelor's Degree

### **Job Responsibilities**

- Maintain strict confidentiality and security of the personal health information contained in the data sources.
- Build basic databases for specific analysis using SQL or other software. Work with databases performing functions as data cleaning and maintenance; extracting data, importing/exporting data into various formats.
- Formulate queries to extract, manipulate, format and present data stored in relational databases. Use SQL, MS Access, and Excel; other software as appropriate to task. Perform data analysis through such functions as: creating summaries and tables; running summary statistics, trend analyses and estimations; refining database queries to generate subsets of databases and tables.
- Provide guidance to Project Managers in selecting and installing a project management system. Assist Data Analysts in maintaining the system.
- Guide Data Analysts in learning to complete their tasks. Provide technical assistance.
- Document all work by following established procedures. Prepare reports on analysis.
- Serve as a Team Lead by planning, coordinating, and documenting project related activities, managing the team, as well as communicating directly with a client.
- Communicate with and between technical and non-technical end users, providing clear explanation of procedures used and results obtained from data analysis tasks.
- Participate in special projects.

## **Senior Auditor**

**Minimum Level of Education:** Bachelor's Degree

### **Job Responsibilities**

- Conducts audits and reviews to determine compliance with government statutes, federal regulations and policies related to the oversight of the Medicare and/or Medicaid programs, in particular, those related to Program Integrity.
- Applies professional auditing knowledge and skills, at times using as guidelines generally accepted government auditing standards (GAGAS) issued by the U. S. General Accountability Office to help plan, organize, conduct and report on assigned audits and reviews; including audit objectives, scope, methodology, field work, analysis, findings, conclusions and recommendations.
- Maintains strict confidentiality and security of the personal health information contained in project data sources.
- Serves as a Team Lead by planning, coordinating, and documenting project related activities, managing the team, as well as communicating directly with a client.
- Participates in special projects.

## **Junior Auditor**

**Minimum Level of Education:** Bachelor's Degree

### **Job Responsibilities**

- Conducts audits and reviews to determine compliance with government statutes, federal regulations and policies related to the oversight of the Medicare and/or Medicaid programs, in particular, those related to Program Integrity.
- Applies professional auditing knowledge and skills, at times using as guidelines generally accepted government auditing standards (GAGAS) issued by the U. S. General Accountability Office to help plan, organize, conduct and report on assigned audits and reviews; including audit objectives, scope, methodology, field work, analysis, findings, conclusions and recommendations.
- Maintains strict confidentiality and security of the personal health information contained in project data sources.
- Supports the Team with the materials needed for required reports and contract deliverables.
- Participates in special projects.

## **Subject Matter Expert**

**Minimum Level of Education:** Bachelor's Degree

### **Job Responsibilities**

- Maintain strict confidentiality and security of the personal health information contained in the data sources.
- Work with Data Analysts, Statisticians, Regulatory Analysts and other SGS Team Members as necessary to define potential areas or topics for analysis. These potential areas will be formed into discrete hypotheses by the data analysts.
- Review hypotheses prior to testing to ensure the Data Analysts and Statisticians capture the appropriate elements to be included in the data run/test.
- Receive results of data runs to test hypotheses. Review the results, analyze and provide comment, recommendations for further effort, interpretation and/or conclusions. Document work according to quality assurance standards.
- Apply program and management expertise to assure quality in all phases of data analysis work: Research and Developing Hypotheses, Developing Study Design, Data Validation, Review & Interpretation of Findings, Reviewing Reports.
- Adhere to IMS Quality Assurance standards including: following the SOP in areas assigned, resolving problems that might affect or be encountered by others, identifying and sharing best practices that could be helpful to others and documenting all work by following established procedures.
- Participate in special projects and development of follow on work or new projects with current, new and prospective clients.
